Inpatient Care

At the Bannasch Institute for Advanced Rehabilitation Medicine, we provide leading-edge therapy for patients with conditions including, but not limited to, stroke, brain injury, spinal cord injury, major multiple traumas, complex orthopedic conditions, amputation and neurological disorders. Rehabilitation Services are personally tailored to each individual in our care, often exceeding the required hours of therapy during their stay, giving them the best chance possible for maximal recovery.

The 32-bed Bannasch Institute is situated on the sixth floor of the award-winning Lakeland Regional Health Medical Center. When a patient is ready to be admitted from acute medical care to rehabilitative care, this convenient location eliminates excess travel for friends and family.

Our inpatient Bannasch Institute offers:

- + Spacious and private patient rooms
- + A therapy gym featuring state-of-the-art rehabilitation machines and equipment, and a daily living area where patients can practice everyday tasks
- + The Vector Gait & Safety System is featured in the therapy gym and a similar lift system (Prism lift) is located in our patient rooms.
- + A meditation room, communal dining area, private therapy areas, transitional living suite and meeting rooms
- + An outdoor therapy area featuring a serenity garden and different surfaces to practice walking with the assistance of our therapists

Seamless Transition

Stay with the team you trust throughout your Rehabilitation Journey

One of the many benefits of receiving rehabilitative care from the Bannasch Institute for Advanced Rehabilitative Medicine is the ease of transition from one level of care to another. A patient's medical records and clinical notes follow them through each level of care. Many patients start their journey in the hospital receiving acute medical care from perhaps a variety of

physicians and clinical providers, depending on their condition. Once patients move to the Bannasch Institute located in our Medical Center, the acute-care doctors and other providers can easily follow up with their patients while they are receiving rehabilitation services. Then, if outpatient care is the next level of care needed, patients can easily move to that next step and focus solely on their recovery. We are guided by your goals and are your partners every step of the way.

Your Seamless Journey through LRH Care

Acute Care

Bannasch
Institute

Outpatient
Care

Outpatient **Care**

Our highly skilled physical rehabilitation team works closely with you and your physician to get you back to your daily activities and routine as quickly as possible. At Lakeland Regional Health, improving and restoring your function, flexibility, strength and endurance are our primary focus.

Our rehabilitation services include:

- + Aquatic therapy
- + Cancer survivor exercise program
- + Hand therapy
- + Lymphedema therapy
- + Manual therapy
- + Neurologic rehabilitation
- + Occupational therapy
- + Pediatric therapy
- + Pelvic floor rehabilitation
- + Physical therapy
- + Speech therapy
- + Spine and joint care
- + Sports medicine

State-of-the-Art Technology at our **Grasslands Campus**

- + High-tech therapy pool, with underwater treadmill, resistance jets and underwater cameras to monitor progress.
- + 100-foot Vector Gait & Safety System in gym that allows patients to complete gait training without the risk of falls.
- + Gym area devoted to pediatric therapy, featuring a rock-climbing wall and trampoline.
- + Outdoor rehabilitation garden providing various walking surfaces and play area for children.
- + Groundbreaking therapy equipment to help with hand rehabilitation and eye-hand coordination.

Return to Driving Program

We provide a medically-based assessment which includes assessment of physical, cognitive, visual and instrumental activities of daily living (IADL) abilities as it relates to pre-driving readiness. This is called a clinical driving screen. It is done in the clinical setting and indicates risk or need for follow up for medically at risk drivers. If appropriate, this clinic has a driving simulator to practice driving skills in the safety of the clinic.

Physician **Services**

Our Physical Medicine and Rehabilitation physicians diagnose and treat a wide variety of medical conditions affecting the brain, spinal cord, nerves, bones, joints, ligaments, muscles and tendons. Our physicians offer a holistic approach to care throughout a person's lifetime.

They offer such services as:

- + Management of general musculoskeletal, back and neck injuries
- + Neuropathic pain management
- + Spasticity management for all populations
- + Evaluation for equipment needs, orthotics, therapy intervention
- + General neurologic/post-inpatient rehabilitation follow-up care

Our Team is Ready to Care for You

Whether you need inpatient care, home health care or outpatient care, you can have confidence that you are surrounded by a team of physicians, nurses, occupational therapists, physical therapists, speech therapists, coaches, psychologists and other team members ready to help you become the hero of your own journey to health and healing.
